

Water Supply Update

Serving the Communities of Hampton, North Hampton, Rye & Stratham

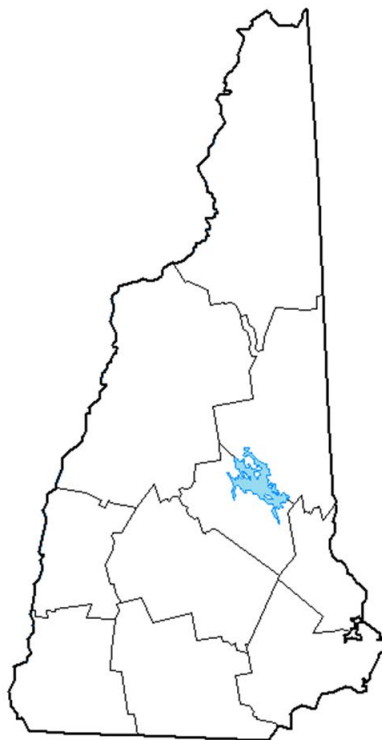

Weather Trends/Outlook

March was much wetter than average. Precipitation totaled 6.6 inches, compared to the long-term average of 4.2 inches. Higher than average precipitation over the past six months has alleviated last year's drought conditions. The U.S. Drought Monitor map shows no dry or drought conditions currently in New Hampshire.

U.S. Drought Monitor New Hampshire

March 28, 2023
(Released Thursday, Mar. 30, 2023)
Valid 8 a.m. EDT
