

# Water Supply Update

*Serving the Communities of Hampton, North Hampton, Rye & Stratham*

## Weather Trends/Outlook

Precipitation in October was much drier than normal; 1.5 inches compared to 5.4 inches on average. This is an ongoing trend and the seacoast is now in a Severe Drought condition (see the U.S. Drought Monitor map below). The lack of rainfall during the fall depresses natural groundwater recharge and increases the probability of low water levels in 2025.
